

TRANSPORT

KAMANYA PAHEERATHAN & KARISHMA MAPPALAKAYIL

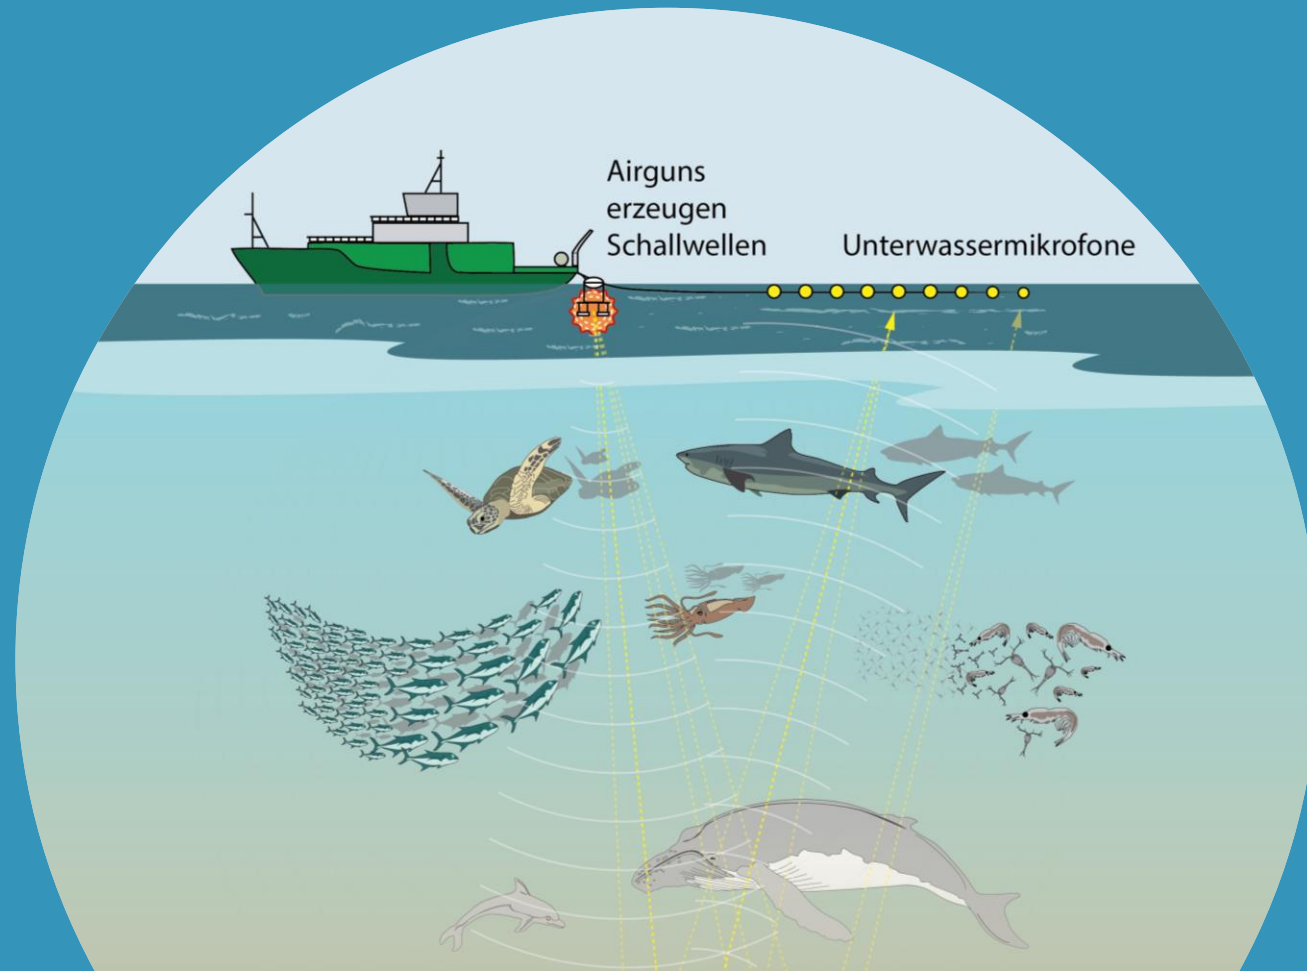

TABLE OF CONTENTS

- General
- Means of transport
- Maritime routes and the environment
- Wind as an energy source at sea

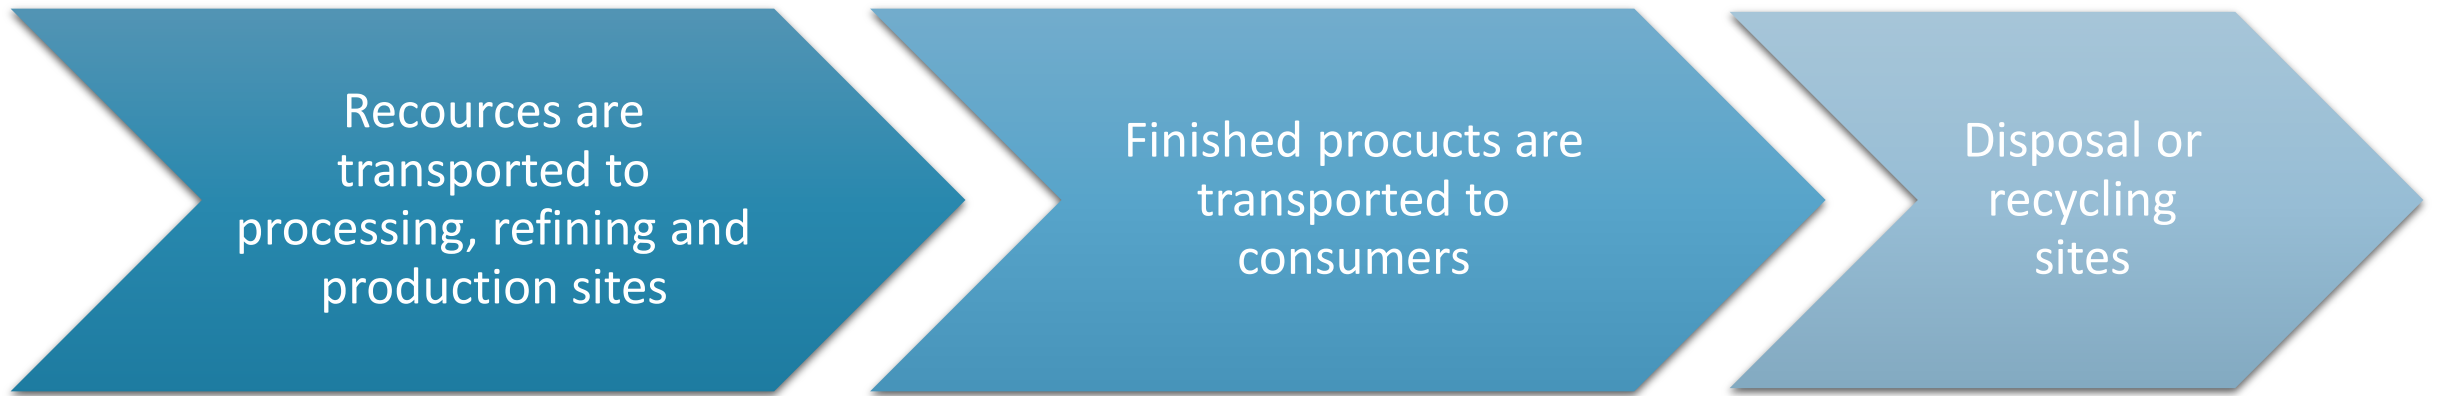

HOW DOES THE NOISE AT SEA AFFECT THE ANIMALS?

A) Helps with the development of the animals B) Causes a great deal of stress C) Better orientation

GENERAL

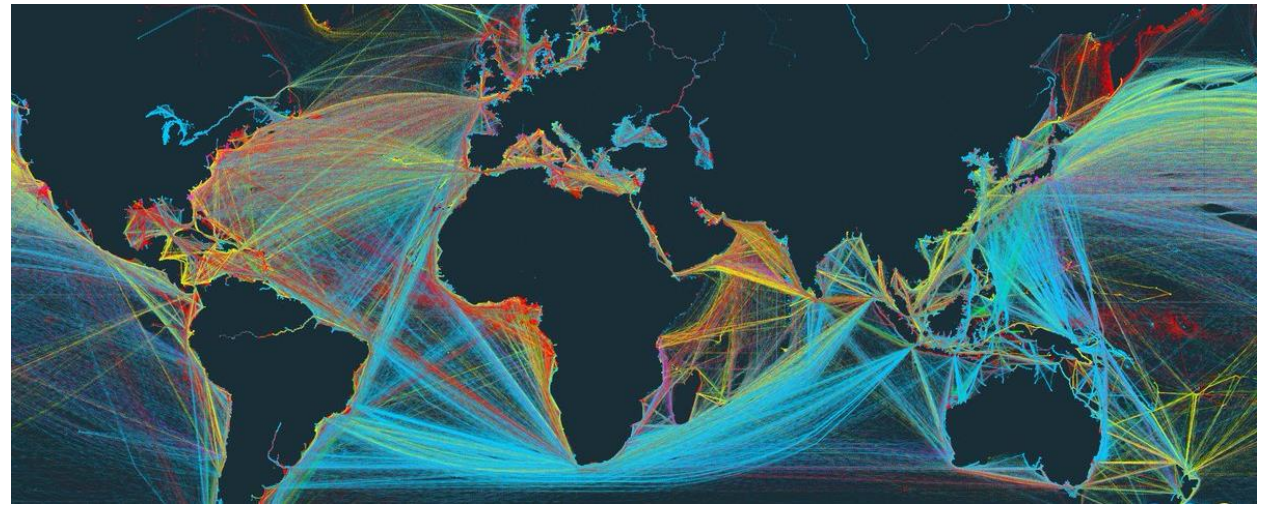

MEANS OF TRANSPORT

- Tanker
- Container ship
- Freight train
- Lorry
- Pipeline

MARITIME ROUTES AND THE ENVIRONMENT

- Pollutants
 - Almost everything transported by ship (e.g. oil, bananas or smartphones)
 - Huge problem for the animals
 - Pollution caused by ships = pollution caused by road traffic
 - Ozone levels are rising faster
- Noise
 - Oceans are noisier now than ever before
 - Military sonars, tanker propellers and other noise sources -> high sound levels
 - Cause stress to animals

WIND AS AN ENERGY SOURCE AT SEA

- Various different possibilities to reducing the fuel consumption, operating costs and emissions of freight ships
- Company „SkySails“
 - Equips container ships with towing kites
 - In order to use the wind as a source of propulsion
 - Saves about 15% fuel

THANK YOU FOR LISTENING 😊!
